

*A few words of welcome
from **François Garay**,
Mayor of Les Mureaux,
President of the Community
of Ariane Cities (CVA) for 2011*

CVA Presidency 2011

At Les Mureaux, space has been a passion for many years. Chance visitors become aware of this very close relationship as soon as they approach the A13 motorway turn-off, where the signs for Les Mureaux clearly reveal the area's space ambitions.

It is thus with feelings of responsibility tinged with emotion that Les Mureaux aspires to assume the 2011 presidency of the Community of Ariane Cities.

Along with the other partner Cities, our City aims to both draw attention to the excellent European network of Ariane Cities and provide a window through which to marvel at the world of science throughout this year.

The City of Les Mureaux would like its inhabitants, and more widely those of the surrounding area, to experience all this Presidency has to offer at the rate of at least one major event per month.

Space will be our Ariadne's thread in 2011 and we are delighted to welcome our partner Cities in the Community to build together a space Europe of tomorrow for its citizens.
